

Welcome to EyeZone's Corporate EyeCare

**Providing High Quality VDU
and Safety Eye Care**

THE HIGH QUALITY CHOICE IN EYECARE

eyezone.ie

EyeZone is a National Organisation representing over 80 Independent Optician Practices throughout Ireland.

According to the EU Directive for Health & Safety at Work, employers must provide employees using a computer screen (VDU) on a regular basis with access to an eye sight test to ensure their eyes meet the standard for safe use of a computer.

VDU (Visual Display Unit)

Also in Ireland approximately 30% of the workforce should be wearing prescription safety glasses while working, and yet every year thousands of people injure their eyes at work through wearing either incorrect, or no protective eyewear.

With this in mind, The EyeZone Group is proud to announce the introduction of The EyeZone Corporate EyeCare Card.

This initiative combines Irish Employer's Health & Safety obligations, with Ireland's largest group of Independent Opticians, providing company owners with the most simple and cost effective solution to Corporate Eyecare available in Ireland today.

Why Choose EyeZone As Your Corporate Eyecare Provider?

- With over 80 practices Nationwide, EyeZone is the largest optical group in the country, so you can rest assured there's an EyeZone practice near you.
- **www.eyezone.ie/corporate** gives you access to our new and unique resource, making your corporate eyecare obligations both simple to implement and excellent value for money.
- This initiative has been designed to help you, the business owner to both identify, and roll out an effective programme to address your company's VDU Screening and Safety Eyewear obligations.
- Our practices are independently owned, so when you choose EyeZone you're supporting Irish SME's, Irish jobs and promoting Irish product awareness.
- Because our practices are independent, we carry stock from a huge range of brands, giving your employees unrivalled choice.
- The EyeZone Brand has been built around being The Quality Choice in Eyecare, so you can rest assured that choosing EyeZone is choosing quality.

VDU screens should be positioned away from windows or direct lighting to prevent glare on the screen, which can lead to visual discomfort.

The optimum distance for working at a VDU is arms length, from 35 to 60cm.

EyeZone & Your Business...

EyeZone's Corporate EyeCare Card Initiative has been designed specifically to help you ensure your employee's eyecare needs are taken care of with a minimal investment of resources. These cards will act as a Purchase Order for your employees, to be redeemed at an EyeZone Optician of their choice, at a time convenient for them.

- Each €25 EyeCare Card will give your employee a comprehensive eye examination at over 80 locations, including a review of all aspects of eye and vision care as well as a thorough eye examination for VDU vision.
- Any employee requiring spectacles solely and specifically for VDU use, can choose a pair of frames including standard prescription plastic lenses from our €69 range absolutely free of charge.
- VDU Spectacles are defined as spectacles that are used solely for VDU work.

The VDU working environment should be spacious, relatively quiet, with a comfortable ambient temperature.

To avoid strain, try the 20/20/20 rule. Every 20 minutes take a 20 second break and focus on an object 20 feet away.

-
- Employees wishing to purchase VDU frames from our designer ranges will receive a €69 discount on the complete spectacle price.
 - Reflection Free Coating on VDU lenses is also offered at a reduced rate of only €30 (this option is payable at the employee's own expense).
 - Our Opticians offer free advice and guidance on minimising VDU related stress, and general eye health care.
 - Our Opticians offer a thorough eye exam and any employees with a PRSI allowance for Optical Benefit will not lose any of their allowance by availing of this test.
 - The EyeZone Corporate EyeCare Card also gives your employees access to many extras, including a 15% discount on their regular prescription eyewear, as well as access to special offers made available to both themselves and their families (not available in conjunction with any other in-store offers).
 - In the event of an employee being advised by an EyeZone Optician that they require everyday glasses, the employer is not liable for any costs associated with supplying these glasses – this is the sole responsibility of the employee.
 - It's the responsibility of the employer to ensure that employees using VDU's on a daily basis are reassessed every 2 years. Our online account management system will allow you to track your employee's last eye examination date & offer you reminders of upcoming appointments.

Blinking exercises which the Optician will explain can be also be used to ensure that the eye is kept lubricated to prevent dry, red eyes.

If you wear glasses while working with a VDU, there are special lenses and coatings available which will reduce the chances of eye strain occurring – our opticians will be happy to guide you through the options.

How to Take Part?

- 1** Log onto www.eyezone.ie/corporate & register your business.
- 2** Log in using your unique Member ID, & then simply enter your employee's details and print the employee's customised EyeZone Corporate EyeCare Cards.
- 3** Once printed & distributed, your company's Corporate EyeCare Cards can be used at any of our 80+ EyeZone Practices Nationwide and will only be debited against your account once redeemed by your employee.
- 4** At the end of each month you will receive a single invoice from EyeZone with a detailed list of all EyeCare Cards redeemed.
- 5** As an added bonus, you will be invoiced just €25 for each Card redeemed as eye examinations are VAT exempt.
- 6** As the Registered Employer, you will also receive EyeZone employee VDU examination reports for your HR records (employee permission must be signed for Data Protection reasons).

EyeZone – Combining
Safety & Style

In Ireland approximately 30% of the workforce should be wearing prescription safety glasses while working, and yet every year thousands of people injure their eyes at work through wearing either incorrect, or no protective eyewear.

For more information,
please visit our partners' website
www.bolle-safety.com/safety-en

Simply choosing safety glasses based on the working environment could prevent up to 90% of these injuries, and with this in mind EyeZone is delighted to announce their partnership with one of the world's leading providers of protective eyewear - Bollé.

Why Bollé? Well, for more than one hundred years Bollé has been striving to determine all possible work environment risks and provide targeted solutions that comply with the most stringent standards. At Bollé the design team is always focused on the fact that the best protection are those that make you want to wear them.

Advantages of Prescription Safety Eyewear.

- Choice of frames to suit personal preferences
- Choice of lens material – plastic or polycarbonate
- Lenses made to exact corrective requirements for the individual's needs
- Hard coated lenses give durability and extend life
- Frames fitted by opticians ensure optimum fit & eye protection
- Prescription Safety Eyewear offer a cost effective long-term solution

How Do Safety Glasses Differ From Regular Glasses?

Safety eyewear must conform to a higher standard of impact resistance than regular eyewear. This higher standard applies to both the lenses and the frames of safety glasses and goggles.

Safety glasses may have prescription lenses or non-prescription (also called plano) lenses. Regardless of their size or the durability of the frame and lenses, regular prescription glasses do not qualify as safety glasses unless they meet specific criteria.

What Type of Safety Eye Wear Do I Need at Work?

To determine what type of Safety Eyewear is required within your company, your safety officer need only consult with an Eye Care Specialist at any of our 80+ EyeZone Practices Nationwide.

For example; carpenters & electricians will require high impact protection, while low impact hard-coated plastic safety glasses could be used by those working in a paint shop, or lab where chemical resistance is more important than impact resistance.

Your eyesight, and that of your employees is precious. Regardless of whether you need non-prescription safety eyewear or prescription safety glasses, the investment you make to protect your eyes and vision will pay dividends as you reduce your risk of a sight-threatening injury.

Ordering your Safety Eyewear through EyeZone couldn't be easier.

- 1** Visit www.eyezone.ie/corporate and create a unique username and password.
 - a. Enter your employee details and select your safety spectacle option, ie - Plastic (CR39 Hard Coated) or Polycarbonate (high impact)
- 2** Fill in the additional optional fields, if required.
 - a. Antiglare Coating
 - b. Tint
 - c. Lens Prism
- 3** Print the EyeCare card and give it to your employee who can bring it to any of our 80+ practices nationwide.
- 4** Your employee will then be tested and dispensed with an appropriate pair of Bollé Prescription Safety Spectacles.

- 5** You will receive a single invoice from Bollé at the end of the month. This invoice will include both the optician's fees and the cost of the safety spectacles.
- 6** The one invoice will cover all employees no matter how many of our practices were visited in the month.

SAFETY

Available Lenses.

Single Vision

One correction for a given working distance.

Delivery Time: 4-5 days.

Bifocal

Provides two corrections, with the lenses split into 2, the top half usually for distance vision, while the lower half is used for focusing on nearer objects.

Delivery Time: 5-9 days
(depending on the prescription).

Varifocal

These lenses have no visible lines, they provide continuous vision adjustment as the power changes, from distance at the top to closer vision at the bottom of the lens.

Lens Materials Available.

CR39 Hard Coated

This material has increased robustness & impact protection, good solvent and chemical resistance, and is also resistant to the effects of hot metal particles.

Polycarbonate

This material offers low energy impact protection, light weight & is scratch resistant.
